Time	Speaker	Affiliation	Lecture
17.00-17.05	<b>INTRODUCTION</b>		
17.05-17.20	Hanna Hajdukiewicz	Institute of Nature Conservation, Polish Academy of Sciences	<i>Twentieth-century development of floodplain forest in Polish Carpathian valleys: The by-product of transformation of river channels?</i>
17.20-17.35	Tomaš Galia	University of Ostrava	<i>Wood in nonperennial fluvial systems: short stories from Greece</i>
17.35-17.50	Paweł Mikuś	Institute of Nature Conservation, Polish Academy of Sciences	<i>Long-term observations of the recruitment and dynamics of large woody debris in Kamienica Stream, Polish Carpathians</i>
17.50-18.05	Lorenzo Picco	University of Padova	<i>Riverine environment affected by volcanic eruption: direct impacts and following cascading processes (Chaiten, Chile)</i>
18.05-18.20	<b>discussion/break</b>		
18.20-18.35	Anastasiia Derii	Institute of Geography and Spatial Management, Jagiellonian University	<i>Functioning of Chorna Cisa riverbed under the influence of human activity</i>
18.35-18.50	Bartłomiej Wyżga	Institute of Nature Conservation, Polish Academy of Sciences	<i>Changes of fluvial processes caused by the restoration of an incised mountain stream</i>
18.50-19.05	Joanna Wąs	Polish Academy of Sciences	<i>Do Carpathian rivers need beavers (Castor fiber)? - potential restoration factor to examine</i>
19.05-19.20	Joanna Zawiejska, Dorota Chmielowska	Institute of Geography, Pedagogical University of Krakow	<i>Patterns of beaver (re)colonization of the Tatra Mountains foreland</i>
