

Tectonic Geomorphology Working Group

Introduction to WG activities:

No change since previous report.

Past activities:

The Tectonic Geomorphology Working Group of the International Association of Geomorphologists has been actively engaged in promoting research and collaboration in our field. Over the past year, our primary activity was organizing the “Tectonic Geomorphology” session at the Regional Conference of Geomorphology, which will take place in Timișoara, Romania, from September 16–18, 2025. This session aims to bring together researchers working on the interactions between tectonics and surface processes, fostering discussions on recent advancements, methodologies, and case studies from diverse geodynamic settings.

Forthcoming activities:

Looking ahead, the Tectonic Geomorphology Working Group is planning a series of activities to further promote research and collaboration. In the coming months, we will organize two online invited lectures, featuring leading experts in the field. Additionally, we are actively preparing the “Tectonic Geomorphology” session for the upcoming International Conference on Geomorphology, which will be held in New Zealand in February 2026.
