

Andean Geomorphology Working Group

Past activities:

During the last 12 months we carried out the following activities:

- We have started the editing work of a special issue titled “Geomorphology of Andes of Argentina and Chile” in the Journal of South America Earth Science. The Guest Editors of the special issue are Dr. Juan Federico Ponce (WG Chair), Dr. José Araos (WG Secretary) and Dra. Laura Perucca (member of WG). The Special Issue provides a compilation of the latest research in different topics about geomorphology of the Andes of Argentina and Chile.
- We have started to organize a symposium titled “Geomorfología de los Andes de Argentina y Chile” in the XXII Congreso Geológico Argentino (Argentine Geological Congress). The coordinators of the Symposium are Dr. Juan Federico Ponce (WG Chair), Dr. José Araos (WG Secretary) and Dra. Laura Perucca (member of WG). The symposium was approved for the committee of the Argentine Geological Congress and we are inviting potential authors.

Forthcoming activities:

- To edit the special issue titled “Geomorphology of Andes of Argentina and Chile” in the Journal of South America Earth Science.
- To hold the symposium titled “Geomorfología de los Andes de Argentina y Chile” in the XXII Congreso Geológico Argentino (Argentine Geological Congress) in San Luis, Argentine, November 17th to 22nd, 2024.
- To advise to Andean governments in crafting public policies concerning natural risk management and environmental protection in the mountainous region.
- To participate in the organization of the second meeting and first workshop titled “Geomorfología en Evolución: Consolidando conexiones y definiendo rumbos desde San Pedro de Atacama”. San Pedro de Atacama (Antofagasta, Chile) October 1st to 4th, 2024.
- To organize a field trip about geomorphology of Fuegian Andes in February - march 2025.
