

IAG WGs Annual Report

Name of the WG

Denudation and Environmental Changes in Different Morphoclimatic Zones
(DENUCHANGE)

WG description (max. 1/2 page)

Please include a brief summary of the objectives & context of the WG. Any new objectives should be detailed. If no change was made since the previous report, please indicate “no changes since previous report”.

no changes since previous report

Past activities (max. 1 page)

Provide a list of the main activities and/or events led by the WG since the last Annual Report, accompanied by a short description of the event and a photo/illustration if possible. Activities/events could include: conferences/lectures/workshops/meetings organised, sessions or field trips organised or chaired at international or regional conferences/workshops, WG meetings, books/special issues published and any other items that are relevant to the objectives of the WG.

N.B.: any financial or other support from the IAG should be specifically mentioned.

IAG DENUCHANGE WG organized thematic sessions at international conferences:

- IAG Regional Conference in Timisoara, Romania, 16-18 September 2025, thematic session “TS6. Extreme Events, Human Impact and Denudation: Synergistic Effects”
- IAG 11th International Conference on Geomorphology in Christchurch, New Zealand, 2-6 February 2026, thematic session “Denudational Dynamics and Hazards in a Changing Environment”.

IAG DENUCHANGE bussiness and planning meetings:

- business and planning in-person meeting took place on 18 September 2025 during the IAG Regional Conference in Timisoara (Romania)
- business and planning in-person meeting took place on 3 February 2026. during the IAG 11th International Conference on Geomorphology in Christchurch (New Zealand)
- virtual business and planning meeting was organized on 16 December 16 2025. During the meeting, Prof. Niki Evelpidou of the National and Kapodistrian University of Athens gave a presentation on ‘The Impact of Climate Change on Denudation in Coastal Zones: Nature-Based Solutions for Sustainable Protection’.

Publications:

- IAG DENUCHANGE members are currently working on the special issue to Geomorphology ‘Denudation dynamics under global change’, edited by Zbigniew Zwoliński, Francesca Vergari, Nurit Shtober-Zisu (<https://www.sciencedirect.com/special-issue/318708/denudation-dynamics-under-global-change>). Six papers have already been

published, and nine are currently under review. The submission deadline has been extended until 30 June.

Other activities:

- On 2 March 2026, IAG DENUCHANGE WG held an event within the framework of International Geomorphology Week, featuring research presentations by three international researchers: Jarosław Cebulski (Poland), Jasper Knight (South Africa), and Anna Karkani (Greece).

Future activities (max. 1/2 page)

List of the main activities or events planned by the WG for the year ahead. You may want to include links to a registration form, your own website or social media, in order to advertise your events (e.g. conferences, workshops).

- IAG DENUCHANGE co-organizes a thematic session “*GM3.3. Drivers of Denudation and Responses of Earth Surface Processes to Extreme Weather and Climate Events*” at the European Geosciences Union (EGU) General Assembly 2026 in Vienna (03-08.05.2026)
- The 5th IAG DENUCHANGE Workshop will be held in Naxos, Greece, on 6–9 October 2026 (<https://denuchange.vercel.app/>).

Committee members

List of the Committee members with their role (e.g. Chairs, Co-Chairs, Secretary, Steering Committee...) at the time the Annual Report is written with contact details for the website. If no change was made since the previous report, please indicate “no changes since previous report”.
