

Report 13th July 2026

The main activities of the Tectonic Geomorphology Working Group.

Past activities (April 2025 – March 2026)

We organized the thematic session “Tectonic Geomorphology” at the Regional Conference on Geomorphology, held in September 2025 in Timișoara, Romania.

We also organized the session “Tectonic Geomorphology” at the International Conference on Geomorphology, held in February 2026 in Christchurch, New Zealand.

In December 2025, the special issue “Tectonic Geomorphology” was published in *Zeitschrift für Geomorphologie*, Vol. 64 (3–4), 2025, pp. 143–145.

Also in December 2025, the special issue “Tectonic Geomorphology in Different Geodynamic Contexts” was published in *Geomorphology* (Elsevier), Vol. 491 (2025), Article 110035.

Current activities

A new special issue entitled “Dynamic Landscapes: Tectonic Controls on Earth Surface Evolution” is currently open for submissions in *Geomorphology* (Elsevier).
